

March 16, 1976

SENATOR KELLY: Mr. President, I have a question of Senator Marvel. It has two figures for answers. What's the total money appropriated in 691, and how does that compare with our projected income to pay the appropriation?

SENATOR F. LEWIS: Senator Marvel, do you yield to the question?

SENATOR MARVEL: No, no. Can't answer either one of them. I can answer them in the morning or in an hour, but I can't answer them now because it's been impossible to keep up with the amendments.

SENATOR F. LEWIS: Thank you Senator Marvel. Other discussion on 691? Senator Kelly, you wish to continue? Please do so.

SENATOR KELLY: I'll vote in the morning.

SENATOR F. LEWIS: The motion is for the advancement of LB 691 to E & R initial. All those in favor vote aye, those opposed vote no.

CLERK: The President voting aye. 31 ayes, 2 nays.

SENATOR F. LEWIS: LB 691 is advanced. Read the next bill.

(President Whelan presiding)

PRESIDENT: LB 690.

CLERK: Read title to LB 690.

PRESIDENT: Senator Marvel. You think we can follow the procedure we did on 691?

SENATOR MARVEL: No sir, no sir because I'm going to be a rebel on this one. I refuse to support the Committee amendments. If the majority of the Committee wants to make the motion that's fine, but I think that this bill is serious enough. There have been enough comments made that in fairness to this legislative body we should proceed on the basis of programs and adopt the program and then proceed. It would be a different and a slightly more tedious approach, but I think it's serious enough that we ought to do it that way, Mr. President.

First of all,.... Shall I proceed or....? OK. First of all you're talking about the Board of Trustees of the Nebraska State Colleges. I assume everybody has a white sheet. No, no your green bill won't solve the problem. We're in the same position with 690 that we were with 691. You have to get a copy of the amendments to 690. If you will turn to the.... Senator Nichol, you have this large ... you have this large package. If you'll turn to page 96, which is the last few pages, this explains 690. You can see that most of the large package had to do with 691.
